

# M365 Security & Compliance Assessment Service

## M365 boasts over 250 million subscribers globally.

Whilst the adoption rate is impressive, many organisations simply activate the service, stick with default settings, and proceed with their tasks. They often overlook the fact that M365 is an ever-evolving platform, with features being added and removed regularly. What might have been an optimal setup before, may now have become suboptimal or even insecure, leaving your organisation open to cyber threats.

As organisations move towards the “zero trust” cyber security model, understanding and regularly assessing the configuration and security of platforms like M365 becomes vital. With our M365 Security & Compliance service, our team of experienced Microsoft consultants offer a comprehensive audit of your M365 tenant. This audit comprises of a detailed configuration report, uncovering a security stance snapshot and a compliance status. Our expert consultants aim to ensure that you're fully informed about potential data loss risks, security threats, and overall compliance.

## What do you get?

The service includes a full review of your M365 Tenancy:

- Identity & Access Management Posture
- Email Security Posture
- Backup Strategy
- Endpoint Management
- Antivirus & Malware Protection
- Pre-Remediation M365 Security Score
- Data Loss Prevention Posture

The audit delivers:

- Comprehensive Written Report
- Fully Costed Remediation Recommendations
- Optional Cyber Essentials Compliance Status
- Zero Trust Roadmap Position Statement

*More than 90% of data breaches are the result of misconfigured or unsecured cloud services, and Microsoft 365 is no exception. Be proactive – secure your Microsoft 365 tenancy with a comprehensive security and compliance assessment from NAK.*

### How it works

The NAK M365 Security & Compliance service helps organisations like yours to understand the complex and everchanging world of Microsoft SaaS. We work with you to identify your concerns, goals and unique strategy, and use our best practice M365 deployment experience to uncover misconfigurations, missing information, security vulnerability and licence suitability.

We then deliver a fully comprehensive report of your M365 tenant, detailing where remedial work is recommended and why. Each report is completely bespoke and includes a breakdown of effort to action the recommendations. But that's no-obligation! Because M365 and the wider security landscape is constantly changing, we always include an offer of ongoing M365 management and support to ensure best practice and compliance is maintained.

M365 Security & Compliance Assessment

	Email Security Provision
	Identity Management
	Conditional Access Policy
	Backup Provision
	Data Loss Prevention
	Antivirus & Malware
	Endpoint Onboarding

### What makes NAK different?

Handing over critical parts of your IT infrastructure or service delivery to an external provider can be an emotive process. You are looking for a partner not a supplier, you don't want to change the way you work to fit into the rigid processes of an MSP, nor do you want a provider that puts contractual terms ahead of delivering the right outcomes.

You will find NAK to be different. We define ourselves as a Next Generation Service Provider and that means we are agile, ethical and focused. Our aim is to be a seamless extension of your team, bringing expertise, experience and scale. We take the time to get to know you, work your way, and together deliver the best possible IT services to your organisation.

### Focusing on what's important

We are personal and responsive

We are flexible

We are true to our values

We empower you

We bring real-world experience
